- f) **2 gigabit Ethernet ports, built-in POE,built-in bluetooth.**
- g) **Multi-angle adjustable bracket.**
- h) **Up to 30 programmable keys, (6 lines+ 24 paperless programmable keys).**
- i) **EP+ Support external APPLE/Android mobile phone.**
- j) **Built-in USB interface, USB support external UniWIFI adapter and charging.**

## 2. Set up the Phone

### a) Packing List:

Check the packing list before installation, if you find anything missing, contact your system administrator.

- 1\*ES380 IP Phone
- 1\*Handset
- 1\*Handset Cable

- 1\*Ethernet Cable
- 1\*Quick Operation Guide
- 1\*Power Adapter
- 1\*Bracket

IP Phone

Handset

Quick Operation Guide

Ethernet Cable

Bracket

Power Adapter

Wall Mount bracket

( Needs to be purchased separately )

**NOTE:** The cable install method is short A connect the handset, longer B connect the IP Phone.

**b) Phone Installation:**

This section introduces how to install the phone with the components in the packing list:

- Adjust the Bracket
- Connect the Handset and optional Headset
- Connect the Network and Power

**Adjust the Bracket**

Pls follow the following picture to let the bracket adjust to safety

Desk Mount Method

**Connect the Handset and optional Headset**

---

## Connect the Network and Power

You have two options for power supply. Your system administrator will advise you which one to use.

- AC power adapter
- POE(Power over Ethernet) IEEE802.3af
- USB(Standard 0.5A)

Note: If inline power (PoE:Power over Ethernet) is provided, you don't need to connect the power adapter. Make sure the Ethernet cable and hub/switch are PoE compliant.

## 3. Phone User Interface

| Aeromat_Mobile   | 50:6a:03:ad:2c:5b | 2457 | [WPA2-PSK-CCMP][WPS]<br>[ESS]                             | 92%    | <input type="radio"/> |

## 4.1.2 LAN Port

DHCP ?

Hostname(Option 12)

Manufacturer(Option 60)

User Class Information(Option 77)

Static IP ?

IP Address

Subnet Mask

Gateway

Static DNS  on  off

Primary DNS

Secondary DNS

PPPoE ?

Username

Password

MTU  Default: 1500

| ITEM                    | DESCRIPTION  |
|-------------------------|--|
| Network Connection Mode | Network Connection Mode has DHCP, Static IP, PPPoE |
| DNS Settings            | Select the DNS mode that you want.                 |

## 4.1.3 PC Port

As bridge ?

As router ?

IP Address

Subnet Mask

Router DHCP  off  on

Start IP address

End IP address

### AS Bridge

Normally, you should choose “bridge” feature, it means that pc port and LAN port will share the same network.

## AS Router

Router feature is for the phone PC Port. You must input IP address (it’s equivalent to a gateway) and Net mask.If you want to use DHCP function, please turn it on, input start IP and end IP.

### 4.1.4 Advanced

## VPN Setting

When using VPN Setting option, you can set several parameters as follow:

| VLAN Setting    |  |
|-----------------|--|
| Enable VPN      | You can enable/disable VPN for phone and pc. |
| VPN Type:       | Choose the appropriate type of VPN.          |
| VPN Server Addr | VPN server's IP.                             |
| VPN User Name   | VPN user's name                              |
| VPN Password    | A password be used for authentication        |
| OPEN VPN        | Upload the *.ovpn file to the phone          |
| Upload VPN cfg  | Select the VPN configuration to upload       |

## VLAN Setting

**VLAN Settings >>**

**LAN Port**

Enable VLAN

VID  (0~4094)

Priority  (0~7)

**PC Port**

Enable VLAN

VID  (0~4094)

Priority  (0~7)

When using VLAN Setting option, you can set several parameters as follow:

| VLAN Setting         |  |
|----------------------|--|
| Enable VLAN          | You can enable/disable VLAN for phone and PC |
| VID<br>[LAN/PC Port] | The VLAN ID you want the phone or PC to join |

## Port Management Settings

**Port Management Settings >>**

HTTP Port  (1-65535)

Telnet  off  on

Telnet Port  (1-65535)

Local SIP port  (Default: 5060)

RTP port range  --

**Please Note:** After changing the default HTTP port 80, please restart the machine to take effect. Using the new HTTP port to access the Web user interface "http://ipaddr:port".

| Port Management Settings |   |
|--------------------------|---|
| HTTP Port                | The default web port is 80,if you want to change it(for example change it to88),<br>You must input IP and Web port to login the web page(for example <a href="http://192.168.0.200:88">HTTP://192.168.0.200:88</a> ). It will take effect on next reboot. |
| Telnet Port              | The default Telnet port is 23,if you want to change it(for example change it to 2003). You must input IP and Telnet port to login the manage page (for example telnet 192.168.0.200:2003).It will take  |

|                |   |
|----------------|---|
|                | effect on next reboot.  |

Function Keys >>

ES380 have 6 line keys:

| ITEMS             | DESCRIBES  |
|-------------------|--|
| Line              | The default value.   |
| Speed Dial        | You can use this key feature to speed up dialing the numbers often used or hard to remember.   |
| Speed Dial Prefix | You can use this key feature to speed up dial a call with a specified prefix number.   |
| DTMF              | You can use this key feature to send the specification of arbitrary key sequences via DTMF.  |
| BLF               | You can use the BLF feature to monitor a specific user for status changes on the phone.  |
| Paging            | You can use multicast paging to quickly and easily forward time sensitive announcements out to people within the multicast group.  |
| Call Park         | You can use call park feature to place a call on hold, and then retrieve the call from another phone in the system (for example, a phone in another office or conference room).                        |
| Intercom          | You can press the configured intercom key to automatically connect with a remote extension for outgoing intercom calls, and the remote extension will automatically answer the incoming intercom calls |
| BLA               | This feature such as the BLF.  |

NOTE: ONLY WHEN YOU CHOOSE "SPEED DIAL", THE RIGHT OF "NAME","NUMBER" WILL TAKE EFFECT.

## 6.3 Function Keys

Function Keys: If you do not like the default setting with the function keys feature. You can change to whatever you like.

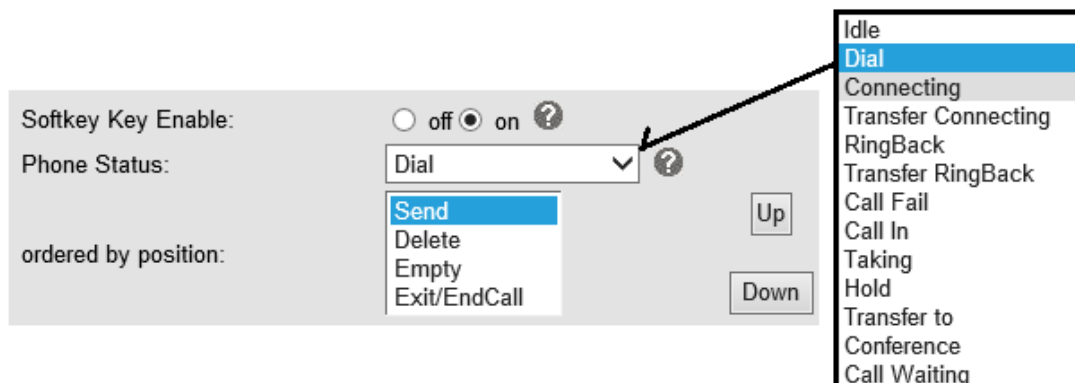

NOTE: IF THE PHONE WITHOUT THE KEY, YOU CAN IGNORE IT.

Note: if the phone has no key, you don't need to set the key

|             | Operation                  | Account  | Name | Number |

Terminated  ?

## 7.8 EP+

EP+ options are for the users who download the EP+ application on mobile phone.

[www.escene.cn/en](http://www.escene.cn/en)

---

After Completing below settings, EP+ will be activated. For more details, please refer to <http://escene.cn/productshow.php?cid=322&id=59&parentcateid=322>

|                        |   |
|------------------------|---|
| Configure Mode         | <input type="radio"/> Automatic <input checked="" type="radio"/> Manual                                 |
| EP+                    | <input type="radio"/> off <input checked="" type="radio"/> Direct Connect <input type="radio"/> Roaming |
| Password               | <input type="text" value="8760"/>   |
| OutCode                | <input type="text"/>  |
| OutCode Length         | <input type="text" value="0"/>  |
| Door bell Code         | <input type="text"/>  |
| Open Door Password     | <input type="text"/>  |
| Roaming Server Address | <input type="text"/> : <input type="text" value="0"/>   |

You can download the Android/IOS EP+ APP by scanning the QR code below. After EP+ APP installed, you can follow the first installation guide to operate:

A) Mobile phone need to be connected to LAN by using WIFI.

B) Using EP+ APP to scan/manually input the IP Phone MAC code.

C) Find the EP+ APP password form IP Phone's LCD menu or WEB. LCD: Press C > View Status > EP+ Password. WEB: Login WEB > Phone Setting > EP+. And then input the password into the EP+ APP.

D) Press Login button.

Note: EP+ setting mode default is automatic. For more information, refer to EP+ user manual.

## 8 Phone Book

The phone book including Group, Contact, LDAP and Ban list, please review the following for more details:

### 8.1 Contact

You can add, edit and delete contact in a phone book on this web page .  
The phonebook can storage 300 contacts entry

| <input type="button" value="Delete"/> | ID | Operation   | Name      | Phone                         | Group |
|---------------------------------------|----|---|-----------|-------------------------------|-------|
| <input type="checkbox"/>              | 1  |    | test test | Number1: <a href="#">1111</a> |       |

|               |               |
|---------------|---------------|
| Serial number | 1             |
| First name    | test          |
| Last name     | test          |
| Office Number | 1111          |
| Mobile Number |               |
| Home Number   | test          |
| Work Number   |               |
| Main Number   | test@test.com |
| Fax Number    |               |
| Other Number  | Auto          |
| Group1        | None          |

Submit Add Number Cancel

If you want to add a Contact, you just ought to click 'Add Contact' .

You can edit an existed Contact by click  .

You can delete an existed Contact by click  , if you want to delete all Contacts, you just ought to click 'Delete All Contact'.

You can edit or move this contact to Ban List after you select  .

You can download and save this contact to PC after you select  .

## 8.2 Group

You can add, edit and delete group in a phone book on this web page.

| ID | Operation   | Group name | Group member | Description | Ring type |
|----|---|------------|--------------|-------------|-----------|
| 1  |   | testgroup1 | 0            | testgroup1  | Ring2     |

Add Group Delete all Groups

|               |            |
|---------------|------------|
| Serial number | 1          |
| Description   | testgroup1 |
| Group name    | testgroup1 |
| Ring type     | Ring2      |

Submit Cancel

If you want to add a Group, you just ought to click 'Add Group' .

You can edit an existed Group by click  .

---

You can delete an existed Group by click , if you want to delete all Groups, you just ought to click 'Delete All Group'.

## 8.3 LDAP

**NOTES: If you want to know more detail about LDAP, pls find it in the office website to download the specific document. [HTTP://www.escene.cn/en](http://www.escene.cn/en). As below figure is an example.**

e.g.

LDAP Name Filter:(sn=%s)

LDAP Number Filter:(telephoneNumber=%s)

Server Address:192.168.0.65

BASE:DC=ldap,DC=escene,DC=com

User Name: bb@ldap.escene.com

Pass Word: escene\_2012

LDAP Name Attributes 1:sn

LDAP Name Attributes 2:cn

LDAP Number Attributes 1:telephoneNumber

---

# 9 Maintenance

**NOTES: Don't cut off the electricity or network cable when doing upgrade in the below ways!**

## 9.1 HTTP Upgrade

You can upgrade the software, kernel and configuration etc. files by HTTP.

|                        |   |   |
|------------------------|---|---|
| Select a File          | <input type="text"/>                    | <input type="button" value="浏览..."/>  |
| Software Upgrade       | <input type="button" value="Upgrade"/>  |   |
| Configuration          | <input type="button" value="Upload"/>   | <input type="button" value="Download"/>   |
| XML Personal Phonebook | <input type="button" value="Upload"/>   | <input type="button" value="Download"/> <input type="button" value="View Phonebook"/> |
| CSV Personal Phonebook | <input type="button" value="Upload"/>   | <input type="button" value="Download"/> <input type="checkbox"/> Show CSV Title       |
| Vcard                  | <input type="button" value="Upload"/>   | <input type="button" value="Download"/>   |
| EXT Module             | <input type="button" value="Upload"/>   | <input type="button" value="Download"/>   |
| Log                    | <input type="button" value="Download"/> |   |
| All Config Files       | <input type="button" value="Download"/> |   |

When using HTTP upgrade, you can set several parameters as follow:

| HTTP Upgrade     |  |
|------------------|--|
| Select a File    | Browse the software/kernel/configuration file which you need to upgrade from HTTP                            |
| Software Upgrade | Used for upgrading the software of the phone   |
| Kernel Upgrade   | Used for upgrading the kernel of the phone   |
| Configuration    | You can used upload/download to upload/download the configure file of the phone                              |
| XML Phone Book   | Used for uploading/downloading the XML phonebook of the phone  |
| Vcard            | Downloading all contacts in the Vcard mode, but upload only support one by one.                              |
| EXT Module       | Used for updating/backup the expansion of the phone<br><b>[NOTES: The mode doesn't support this feature]</b> |
| Log              | Used for the administrator to find out or making sure the problem with this equipment.                       |
| All Config File  | All Config File includes: Configuration, Extern, Log, XML Phone book, Enterprise Phone Book.                 |

---

## 9.2 FTP Upgrade

You can upgrade the software, kernel and configure files by FTP.

|                  |   |   |
|------------------|---|---|
| Server IP        | <input type="text"/>  | Note: It's not necessary to input a file name for backup. |
| File name        | <input type="text"/> ()   |   |
| Username         | <input type="text"/>  |   |
| Password         | <input type="text"/>  |   |
| Software Upgrade | <input type="button" value="Upgrade"/>                                      |   |
| Configuration    | <input type="button" value="Update"/> <input type="button" value="Backup"/> |   |
| Phone Book       | <input type="button" value="Update"/> <input type="button" value="Backup"/> |   |
| EXT Module       | <input type="button" value="Update"/> <input type="button" value="Backup"/> |   |

When using FTP upgrade, you can set several parameters as follow:

| FTP Upgrade      |  |
|------------------|--|
| Server IP        | The IP address of the FTP server   |
| Filename         | Downloading from FTP server  |
| Username         | Providing by FTP server  |
| Password         | Providing by FTP server  |
| Software Upgrade | Used for upgrading the software of the phone   |
| Kernel Upgrade   | Used for upgrading the kernel of the phone   |
| Configuration    | Used for updating/backup to update/backup the configure file of the phone                                    |
| Phone Book       | Used for updating/backup to update/backup the phonebook of the phone   |
| EXT Module       | Used for updating/backup the expansion of the phone<br><b>[NOTES: The mode doesn't support this feature]</b> |

**NOTES: It's not necessary to input filename when doing backup Configuration, Phone Book, EXT Module.**

## 9.3 TFTP Upgrade

You can upgrade the software, kernel and configure files by TFTP.

|                  |   |
|------------------|---|
| Server IP        | <input type="text"/>  |
| File name        | <input type="text"/><br>Note: It's not necessary to input a file name for backup. |
| Software Upgrade | <input type="button" value="Upgrade"/>  |
| Configuration    | <input type="button" value="Update"/> <input type="button" value="Backup"/>       |
| Phone Book       | <input type="button" value="Update"/> <input type="button" value="Backup"/>       |
| EXT Module       | <input type="button" value="Update"/> <input type="button" value="Backup"/>       |

When use TFTP upgrade, you can set several parameters as follow:

| TFTP Upgrade     |  |
|------------------|--|
| Server IP        | The IP address of the TFTP server  |
| Filename         | Downloading from FTP server  |
| Software Upgrade | Used for upgrading the software of the phone   |
| Kernel Upgrade   | Used for upgrading the kernel of the phone   |
| Configuration    | Used for updating/backup the configure file of the phone   |
| Phone Book       | Used for updating/backup the phonebook of the phone  |
| EXT Module       | Used for updating/backup the expansion of the phone<br><b>[NOTES: The mode doesn't support this feature]</b> |

**NOTES: It's not necessary to input filename when doing backup Configuration, Phone Book, EXT Module.**

## 9.4 Auto Provisioning

When you open this auto provision feature, the phone will do auto provision after it detect a different software or kernel (Higher or Lower) which are putted on the TFTP,HTTP,HTTPS,FTP, server. For the detailed information about auto provision, you can find it in the official website: [HTTP://www.escene.com](http://www.escene.com)

|   |  |
|---|--|
| PNP active  | <input checked="" type="radio"/> on <input type="radio"/> off <span>?</span> |
| PNP Interval (minutes)                            | <input type="text" value="60"/>  |
| Auto Provision                                    | <input checked="" type="radio"/> on <input type="radio"/> off                |
| Protocol  | <input type="text" value="TFTP"/> ▼  |
| Software Server URL                               | <input type="text" value="voip.autoprovision.com"/>                          |
| Username  | <input type="text"/>   |

 LCD

Log Save Location 
 Local  Terminal  LogServer

Log Server Address 
 :

Capture packet

---

## 9.5 Local Log

Check the log file on the local.

| Delete                   | ID | Operation | FileName | Size |
|--------------------------|----|-----------|----------|------|
| <input type="checkbox"/> |    |           |          |      |

[Delete all Logs](#) [Download](#)

## 9.6 Default Settings

You can load the phone to the factory default setting in default setting option.

Click [Reset to Factory Settings](#) button to restore all settings to the factory default state.

[Reset to Factory Settings](#)

Press the 'Reset to Factory Setting' option, the phone will load to factory default setting on next reboot.

## 9.7 Reboot

You can use reboot option to reboot the phone.

Attention: Rebooting the phone will result in temporary loss of phone and web services, click reboot to continue.

[Reboot](#)

# 10 Security

## 10.1 Password

Here you can setting the administrator or user WEB password management. Select your type. If you login as an administrator, you can modify both the user's and admin's passwords.

Administrator  User

Username

Old password

New password

Confirm password

## 10.2 Trusted Certificates

| Name   | Begin time | End time | Operation                  |
|--|------------|----------|----------------------------|
| Trusted certificates upload  |            |          | <input type="text"/> 浏览... |
| <input type="button" value="upload"/> <input type="button" value="Delete all certificates"/> |            |          |                            |

## 10.3 IP Strategy

You can use IP Strategy feature to make a list which can be set to only allow the incoming call on the list.

e.g. As following picture you can see it has 192.168.0.248 in the list. When you open this feature. It means you just allow come from this IP address meeting

IP Strategy  off  on

| ID   | Operation | IP Address | Description | Account |
|--|-----------|------------|-------------|---------|
| <input type="button" value="Add IP Strategy"/> <input type="button" value="Delete all IP Strategies"/> |           |            |             |         |

# 11 WEB Other Settings or Information - Appendix

## 11.1 Logout

Logout the IP Phone web management.

## 11.2 Note Tips

In the right middle of the website page, there is a Note tips in every function page. Hope it can help you to know something about that.

### Note

#### **Register status:**

It shows the Register Status.

#### **Network Status:**

It shows the information of LAN port and PC port.

#### **System Info:**

It shows the version of firmware
